Instructions

- Please answer the questions in the following two pages using the text boxes.
- Do not change the format, font size, or any other elements of this template.
- Be concise and precise.
- Do not exceed the given limit of maximal number of characters. The given limits are intended including white spaces (e.g., the sentence “*This is a nice sentence*” contains 23 characters).
- “The app” in the questions below refers to the Android-based application that you will be developing in the context of the Mobile Computing 2017 class.
- Once completed, please upload this form on iCorsi under the **"Project Description, Storyboard, and Presentation"** assignment page.
- The deadline for uploading the document is Friday, November 03, 2017, 08:15 CEST.
- If you have any questions: please post the question(s) on iCorsi forum page or send an email.

1. What is the name of your app?

2. Which problem does the app solve? (Max. 200 characters)

3. How does your app solve this problem? (Max. 650 characters)

4. Why is this problem relevant? (Max. 300 characters)

5. Do other apps exist to solve this (or a very similar) problem?

Yes [☐] No [☐]

6. If you answered *yes* to question 5, list the existing apps that are most related to yours and explain how these solutions differ from your own. If you answered *no* to question 5, explain why do you think nobody else has solved this problem before. (Max. 650 characters)

7. Which built-in sensors of your phone does the app use? (Max. 200 char.)

8. Which built-in actuators of your phone does the app use? (Max. 200 char.)

9. Does your app store sensor data locally, remotely, or in both ways?

Locally [☐] Remotely [☐] Both [☐]

10. Motivate your answer to question 9 (i.e., explain why your app stores data and why only locally/remotely or in both ways). (Max. 650 characters)

11. Does your app use any type of data visualization?

Yes [] No []

12. If you answered *yes* to question 11, explain which type of data visualization your app offers and why. If you answered *no* to question 11, explain why data visualization is not necessary for your app. (Max. 650 characters)

13. Does your app perform any type of data processing on the collected sensor data?

Yes [] No []

14. If you answered *yes* to question 13 explain which type of data processing your app performs on the collected data and why. If you answered *no* to question 13 explain why data processing is not necessary for your app. (Max. 650 characters)

15. How do you evaluate whether your app performs correctly and achieves its goal (i.e., solves the problem described in question 2)? (Max. 650 characters)

16. Does your app use any third-party services? (e.g., Google Maps, Google App Engine, external online servers and databases, etc.)

Yes [] No []

17. If you answered *yes* to question 16, list the services your app makes use of. (Max. 200 char.)

18. Which permissions does your app require to be granted by the user? (Max. 200 characters)

19. Which are the main challenges that you need to overcome in order to build your app? (Max. 300 characters)
